

AKASH TOMY

Full Stack Developer — Django | React | AWS

Alappuzha, Kerala, India | +91 9497634775 | akashtomy174@gmail.com | akashtomy.com | [LinkedIn](https://www.linkedin.com/in/akash-tomy) | [GitHub](https://github.com/AkashTomy174)

PROFESSIONAL SUMMARY

Backend-focused Full Stack Developer who designed, built, and deployed EasyBuy — a production multi-role e-commerce platform on AWS EC2 — cutting database queries 42% through Redis caching and ORM optimization. Combines Django/DRF backend depth with React frontend delivery and hands-on AWS/CI-CD deployment ownership (Nginx, Gunicorn, GitHub Actions). Self-driven, ships fast, and integrates AI capabilities (Gemini, OpenAI) into production systems.

FEATURED PROJECT

EasyBuy — Full Stack E-Commerce Platform | easybuy.akashtomy.com | github.com/AkashTomy174/easybuy

Python, Django, React.js, MySQL, AWS (EC2, RDS, S3), Redis, Celery, Razorpay, GitHub Actions, OpenAI API

- Built and deployed a multi-role e-commerce platform (Customer, Seller, Admin) on AWS EC2 with Nginx and Gunicorn — built and shipped during SMEC Technologies internship
- Cut database queries 42% on key pages (36 → 21) using Redis caching and Django ORM optimization (Prefetch, select_related)
- Designed a concurrency-safe payment system using database row locking (select_for_update), preventing duplicate order processing and overselling from concurrent requests
- Integrated Razorpay with HMAC webhook signature verification for secure checkout across all 3 user roles
- Offloaded notifications and email delivery to Celery async workers with DB fallback, keeping order response times under 300ms
- Built a product-aware AI chatbot (OpenAI API + Cloudflare Workers) with live catalog context injected per request
- Automated deployments via GitHub Actions CI/CD with minimal-downtime Gunicorn reloads and pre-flight migration checks

INTERNSHIP EXPERIENCE

Python Full Stack Developer Intern — SMEC Technologies | Jul 2024 – Present

- Implemented Redis caching across catalog, header, wishlist, and auth lookups on high-traffic pages, working through daily code reviews and iterative profiling to identify bottlenecks
- Developed reusable React components for shared UI patterns (navigation, cards, modals) used across the Customer, Seller, and Admin interfaces
- Designed normalized relational schemas in MySQL with foreign key constraints and indexing for clean data relationships
- Deployed Django applications to AWS EC2, configuring Nginx as reverse proxy and Gunicorn as WSGI server for production
- Maintained clean Git history with a feature-branch workflow and pull requests through daily code reviews

OTHER PROJECT

Personal Portfolio with AI Clone | akashtomy.com | github.com/AkashTomy174/portfolio2

React, Vite, Tailwind CSS, FastAPI, Google Gemini API, AWS EC2, Nginx, Cloudflare

- Built an AI-powered chat widget (RAG over a structured knowledge base via Google Gemini API) that answers recruiter questions about skills and experience in real time
- Deployed FastAPI backend on AWS EC2 with Nginx, Certbot SSL, and PM2 for zero-downtime process management
- Configured Cloudflare DNS/HTTPS for secure communication between Vercel frontend and AWS backend
- Achieved 95+ Lighthouse scores (Performance, Accessibility, Best Practices, SEO) via code-splitting, image optimization, and CSP/HSTS headers

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, REST APIs, WebSockets

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite

Data: MySQL, Amazon RDS, Redis, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS), Nginx, Gunicorn, PM2, Certbot, GitHub Actions CI/CD, Linux, Cloudflare

AI Integration: Google Gemini API, OpenAI API, RAG

Auth & Payments: JWT, OAuth 2.0, Razorpay

Tools: Git, GitHub, Postman, Figma

EDUCATION

Bachelor of Computer Application (BCA) — Christ College Pulliyanmala, Kattapana, Idukki

2022–2025 | CGPA: 7.48 | Coursework: Data Structures, DBMS, Cloud Computing, Design & Analysis of Algorithms

LEADERSHIP & EXTRACURRICULARS

NSS Volunteer — 8th Grade through Degree (~7 years continuous service)

Student Council Representative — Christ College Pulliyanmala (2024–2025), elected by final-year cohort

LANGUAGES

English, Malayalam, Hindi, Tamil
